Q&A

Coco Skin Laser Health

Boutique laser treatments and cosmetic medicine

Boasting a team of experienced Dermatologists, Dermal Therapists and Registered Nurses, **Coco Skin Laser Health** provides progressive, well researched and holistic treatments to improve their clients' skin and resolve any underlying skin issues.

Coco Skin Laser Health's main focus area is in skin rejuvenation, working with men and women of all ages, and includes services such as platelet rich plasma therapy, broadband light therapy (BBL), laser resurfacing treatments, laser facials, LED light therapy, cosmetic injectables, skin care and makeup consultations.

The team behind Coco Skin Laser Health also promotes the reduction of stress through methods such as meditation and yoga to assist in overcoming many skin concerns. We asked Co-Founders Sarah Relic and Melissa Melia how *jane iredale* is molded into their business.

Q. What is it about *jane iredale* that you love?

A. "We love that *jane iredale* acts as both a medicine and a makeup for the skin. It can effectively calm down irritated and inflamed skin by cooling and soothing and is effective on skin conditions such as rosacea, dermatitis and acne. When you use *jane iredale* foundation regularly in your routine, your skin condition, sensitivity and inflammation improves with time. We love that there are a great range of colours to suit many skin types."

Q. How does *jane iredale* enhance your client experience?

A. "The Liquid Minerals are fantastic for use after laser and light based treatments as the aloe vera instantly calms and reduces the heat experienced by the patient. They also leave the clinic like nothing ever happened... it's our little secret."

Q. What is your top selling *jane iredale* product and why?

A. "All of our coco babes love Moonglow Bronzer and POMMISST Hydration Spray which is popular among clients. We use Moonglow for cheek and eye definition as it gives that sun kissed and chiseled look whilst maintaining a natural appearance and POMMISST to prolong your glow throughout the day. These are favourites among all staff and clients!

"We also love the staples such as the Liquid Minerals, primer and Amazing Base."

Q. How do you successfully prescribe *jane iredale* during your services?

A. "We use *jane iredale* post treatment as it is gentle enough to be applied on irritated skin after a treatment. This is a great opportunity to demonstrate the benefits of the range." ■
